**HOW TO REPLY TO THIS NOTICE:**

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

### **DETAILED ACTION**

1. This Office Action is responsive to the Amendment filed on 01/13/10. Accordingly, claims 1-8 and 10-42 are currently pending; and claim 9 is canceled.

### **EXAMINER'S AMENDMENT**

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

#### **IN THE SPECIFICATIONS:**

- On page 3, line 3, "claim 14" is changed to --claim 13--.
- On page 3, line 4, "claims 2-13" is changed to --claims 2-12--.
- On page 3, line 5, "claims 15 and 16" is changed to --claims 14 and 15--.

3. Note that the above amendments are necessary because at the patent publication of the application, the original claim 14 will be renumbered as claim 13; original claims 10-13 as claims 9-12, respectively; and original claims 15 and 16 as claims 14 and 15, respectively.

### **REASONS FOR ALLOWANCE**

4. Claims 1-8 and 10-42 are allowed.

5. The following is an examiner's statement of reasons for allowance:

-Regarding independent claim 1, none of prior art of record teaches or suggests an apparatus for determining a frequency offset error, comprising an input for receiving a frequency demodulated signal, said frequency demodulated signal being processed by means for

performing a correlation in order to determine whether a correlation criterion is fulfilled, means for performing a minimum-maximum evaluation in order to determine whether a minimum-maximum criterion are fulfilled, and processing means for calculating a current offset of the frequency demodulated signal and to cancel the current offset if both criteria are fulfilled, wherein the means for performing the minimum-maximum evaluation determines whether expected peaks of positive and negative half-waves of the frequency demodulated signal have predefined distances.

-Regarding independent claim 14, none of prior art of record teaches or suggests a receiver comprising: an apparatus for determining a frequency offset error, the apparatus including: an input for receiving a frequency demodulated signal, said frequency demodulated signal being processed by means for performing a correlation in order to determine whether a correlation criterion is fulfilled, and means for performing a minimum-maximum evaluation in order to determine whether a minimum-maximum criterion are fulfilled, said apparatus further comprising processing means to calculate the current offset of the frequency demodulated signal and to cancel the current offset if both criteria are fulfilled, wherein the means for performing the minimum-maximum evaluation determines whether expected peaks of positive and negative half-waves of the frequency demodulated signal have predefined distances.

-Regarding independent claim 17, none of prior art of record teaches or suggests an apparatus for determining a frequency offset error, comprising an input for receiving a frequency demodulated signal, said frequency demodulated signal being processed by means for performing a correlation in order to determine whether a correlation criterion is fulfilled, wherein the means for performing a correlation comprise a correlator, a peak detector and a comparator;

means for performing a minimum-maximum evaluation in order to determine whether a minimum-maximum criterion are fulfilled, and processing means for calculating a current offset of the frequency demodulated signal and to cancel the current offset if both criteria are fulfilled.

-Regarding independent claim 20, none of prior art of record teaches or suggests an apparatus for determining a frequency offset error, comprising an input for receiving a frequency demodulated signal, said frequency demodulated signal being processed by means for performing a correlation in order to determine whether a correlation criterion is fulfilled; means for performing a minimum-maximum evaluation in order to determine whether a minimum-maximum criterion are fulfilled, wherein the means for performing a minimum-maximum evaluation comprise two subtractors and two comparator, and processing means for calculating a current offset of the frequency demodulated signal and to cancel the current offset if both criteria are fulfilled.

-Regarding independent claim 23, none of prior art of record teaches or suggests an apparatus for determining a frequency offset error, comprising an input for receiving a frequency demodulated signal, said frequency demodulated signal being processed by means for performing a correlation in order to determine whether a correlation criterion is fulfilled; means for performing a minimum-maximum evaluation in order to determine whether a minimum-maximum criterion are fulfilled, and processing means for calculating a current offset of the frequency demodulated signal and to cancel the current offset if both criteria are fulfilled, wherein the processing means comprise an average detector, an offset register, and an offset compensator to subtract the current offset stored in the offset register from the frequency demodulated signal.

-Regarding independent claim 28, none of prior art of record teaches or suggests an apparatus for determining a frequency offset error, comprising an input for receiving a frequency demodulated signal, said frequency demodulated signal being processed by means for performing a correlation in order to determine whether a correlation criterion is fulfilled; means for performing a minimum-maximum evaluation in order to determine whether a minimum-maximum criterion are fulfilled; processing means for calculating the current offset of the frequency demodulated signal and to cancel the current offset if both criteria are fulfilled, and two comparators serving as limiters followed by building blocks arranged to extract said frequency demodulated signal from a modulated signal.

-Regarding independent claim 31, none of prior art of record teaches or suggests an apparatus for determining a frequency offset error, comprising an input for receiving a frequency demodulated signal, said frequency demodulated signal being processed by means for performing a correlation in order to determine whether a correlation criterion is fulfilled; means for performing a minimum-maximum evaluation in order to determine whether a minimum-maximum criterion are fulfilled; processing means for calculating the current offset of the frequency demodulated signal and to cancel the current offset if both criteria are fulfilled, and wherein the means for performing a correlation correlates the frequency demodulated signal with a time-limited sine wave signal, and determines whether the result of this correlation exceeds a certain threshold.

-Regarding independent claim 37, none of prior art of record teaches or suggests an apparatus for determining a frequency offset error, comprising an input for receiving a frequency demodulated signal, said frequency demodulated signal being processed by means for

performing a correlation in order to determine whether a correlation criterion is fulfilled; means for performing a minimum-maximum evaluation in order to determine whether a minimum-maximum criterion are fulfilled; processing means for calculating the current offset of the frequency demodulated signal and to cancel the current offset if both criteria are fulfilled, and wherein the means for performing a minimum-maximum evaluation calculates two subtractions in order to compare four received symbols with corresponding amplitudes.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
